

Economic Overview And Outlook: New Mexico

JOBS

- Including July, the private sector has gained jobs nationwide for 29 consecutive months.
- In New Mexico, private sector employment fell by 7.1 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 1.3 percent.
- In New Mexico, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in New Mexico have experienced the greatest employment increases: mining; education and health services; and manufacturing.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

How Does New Mexico Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare New Mexico to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within New Mexico since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in New Mexico.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates job losses (or even gains) lower than the national average.
